

## JobOps Base and Time Tracker Training (Minneapolis, MN)

This 4 day course covers a thorough instruction of the JobOps Base and Time Tracker modules. You will learn the unique integration between JobOps and key Sage MAS 90 and 200 ERP modules. Through hands-on activities you will learn the module setups, create and modify work tickets, and explore procurement tools for purchased and manufactured materials. You will also learn how to assign and issue components, record labor and invoice work tickets.

**Certification:** A required product certification exam is administered to all attending resellers.

**Prerequisite:** A working knowledge of the Sage MAS 90 or 200 core and distribution modules.

**Training courses** are held at the Synergistic Software Solutions Training Center in Minneapolis.

**For Pricing and Current Schedule:** check the JobOps website at [www.jobops.com](http://www.jobops.com).

## JobOps Learning Solutions Increase Your Product Knowledge and Solutions Expertise

At JobOps, we're dedicated to providing you with a total learning experience that builds on your knowledge of our software. When our partners complete a training course they are better equipped to recommend and support our JobOps Solution and its add-on modules.

Our courses are designed to deepen your knowledge and skill level so you can more effectively advise your customers on the time and money-saving features and enhancements of JobOps.

Our JobOps specific courses and learning formats, both in classroom and Web-based settings, provide a wide range of options to fit product training into your schedule and get you up to speed quickly. New schedules and topics are offered frequently so check our website at [www.jobops.com](http://www.jobops.com) for the most current topics, schedules and pricing.

*Time Tracker is one of modules that you will learn in the base training course.*

*Synergistic Software Solutions, LLC, the software publisher of JobOps, offers JobOps product certification training courses both in a classroom and Web-based setting. For the most current schedule, agenda, Information and registration, please visit [www.jobops.com](http://www.jobops.com).*

## JobOps Enhanced Scheduling Training

The Enhanced Scheduling class is offered in a 2-part session via web-based training.

This training course covers the setups and deployment of the Enhanced Scheduling add-on module. You will learn how to create scheduling centers and to schedule work tickets, understand material constraint scheduling and the capacity-based scheduling methods. You will also learn the tools of scheduling and managing scheduled work tickets via the powerful JobOps Scheduling Control Hub. You will utilize Batch Scheduling Regeneration to shift schedules of existing work tickets and to schedule new work tickets, and review the special scheduling reports.

## JobOps Field Service & Dispatch Training

The Field Service & Dispatch class is offered in a 2-part session via web-based training.

This training course covers the setups for the Field Service & Dispatch module, the logging, managing and dispatching of new calls, the generation of preventive maintenance tickets, as well as setting up service agreements, billing prepaid service agreements, and the recording of costs using Service Ticket Billing Entry and the billing of service ticket calls.

### Additional Information:

**Prerequisite:** A working knowledge of the Sage MAS 90 or 200 core and distribution modules and Product Certification Training on JobOps Base and Time Tracker is required for all Web-based training classes.

**Certification:** A required product certification exam is administered to all attending resellers for each course.

**Pricing/Schedules:** Check the website for current pricing and schedules at [www.jobops.com](http://www.jobops.com).

## JobOps Product Configurator Training

The Product Configurator class will be offered in a 2-part session via web-based training.

This training course explores the JobOps Configurator module, a sophisticated rules-based configuration engine used to gather information about an order to construct a work ticket complete with instructions, parts and budgets with the capability of calculating pricing and detailed descriptions. You will learn the terminology and how to incorporate Providex "code snippets" logic as well as review in-depth Configurator functionality by walking through the features and options of a sample configuration.

Through hands-on exercises you will analyze the requirements of and construct a working configuration.
